

The Most Complete K-12 Web Filter

GoGuardian Admin's flexible content filtering helps K-12 school districts manage users and policies from a unified interface. Its advanced AI continuously analyzes digital content to help create a safer and more productive online experience.

Why GoGuardian Admin?

GoGuardian Admin makes it easy and efficient to manage users, regardless of device type, OS, or browser. No matter how complicated the environment, GoGuardian Admin helps manage district and school policies from a single interface.

- Create a **safer online experience** with powerful filtering capabilities.
- **Better protect students** from explicit content, wherever it occurs.
- Manage even the most complex K-12 environments with our **flexible and easy-to-use** solution.
- **Help protect every user on a school or district network**, regardless of device, browser, or operating system.
- Get up and running in **as little as 10 minutes**.

Key Features:

Powerful Filtering Capabilities

Advanced technology that scans docs, mail, social, search, and web content.

Granular Reporting

Easily access usage and trends at the individual student and Org Unit levels.

Parent App

Give parents direct access to student activity and filtering controls at home.

Multi-Platform Support

Any device. Any browser. Any operating system.

Suicide Prevention Capabilities

Proactively identify students at risk of suicide with Beacon Starter.

On and Off-Campus Filter

Set different rules based on time and device location.

Problem	Solution	Value
Do your students often end up in online places where they shouldn't be?	GoGuardian's granular filtering capabilities, which include YouTube and social media sites, help to create customizable guardrails, so schools can guide students in the right direction.	Students strive to become better digital citizens.
Is your traditional filter blocking content without context?	GoGuardian Admin's advanced AI filter dynamically updates to keep up with the internet so you don't have to.	Less work for you and your team, less disruptions, and a more productive learning experience for students.
Did you know that nearly 20% of all explicit content that students encounter online occur in legitimate collaboration tools?	Some filters only offer single-instance scanning that doesn't update with changing online activity, but GoGuardian Admin continuously scans and picks up contextual nuances.	The result is a safer online experience for students.
With such a tough job in a complex K-12 environment, do you spend most of your day trying to keep things functioning properly?	GoGuardian Admin is flexible enough to handle this K-12 complexity, serve as a single source of all your filtering needs, and remain easy to set up and manage.	Feel confident knowing that your students are safe and your district's policies are being supported.
Do you have a mix of school-issued devices, BYOD, and guest environments that you need to protect on your network?	GoGuardian Admin can help protect users regardless of device type, OS, or browser.	One content filter that manages filtering policies for everything in your device inventory.
