eSignatures for Everyone

Easily send and sign your most important documents with HelloSign, an intuitive eSignature platform.

With a suite of powerful features, HelloSign enables users to set up delightful signing experiences for any use case, from sales to HR to legal and operations.

- Improve document turnaround times **by up to 80%**

- Improve completion rates **by as much as 26%**

- Shorten sales cycles **by as much as 10 days**

- **Ensure transparency** with a full signer audit trail

- Get to ROI **2x faster*** than other legacy eSignature leaders (G2 Crowd 2018)

HelloSign provides an intuitive way for the modern enterprise to send and request electronic signatures from their employees, prospects, customers and partners. HelloSign lets businesses integrate leading eSignature functionality directly into their business processes, complete with a seamless user interface, easy-to-use admin controls, and powerful enterprise-grade security.

"We started using HelloSign in the beginning of 2016 and have had great success closing deals more quickly - sometimes while the sales rep is still on the phone with the prospect!

**- Kathryn Hunt,
Product Marketing @ Vendini**

* Based on G2 Crowd respondents

Trust, Security, and Support

Trust and Security are our first priorities

Everything we do at HelloSign is done with security top of mind. HelloSign delivers 99.99% uptime and is a SkyHigh CloudTrust provider with the highest available rating of, "Enterprise-ready". We are compliant with all major eSignature laws including ESIGN, UETA, and European eIDAS. Our SSL encryption, world-class server infrastructure, and audit trails ensure that your documents are kept safe and secure. Finally, multiple layers of authentication verify every signer's identity and documents are encrypted using AES 256-bit encryption.

Compliant and Secure

- Compliant with ISO 27001, SOC 2 Type II, HIPAA, GDPR, eIDAS and more

- All eSignatures are legally binding (documents post-signing are non-editable)

- All documents are encrypted at rest using AES 256-bit encryption

- For any document in transit to be signed, all communications are encrypted using SSL/TLS

- All backups are encrypted

- All passwords are hashed and salted

- Penetration testing is done by an independent third party

- Hosting in a state-of-the-art SSAE 16 audited facility that is also ISO 27001

- Audit Trails

- Role-based security

- Private Bug Bounty program with HackerOne (same as US Pentagon)

- HSTS is enabled (HTTP Strict Transport Security)

Concierge Level Support

We understand that every deployment is unique and support is an important part of success. With one of the most complete support offerings on the market, from our no-code options to our API solutions, our teams ensure customers can always get the help they need. Best of all, support is included with all HelloSign plans!
