

Trend Micro™

WORRY-FREE SERVICES ADVANCED

Cloud-based protection for your business devices and email

The threat landscape used to be black and white—you kept the bad stuff out and the good stuff in. Now it's harder to tell the good from the bad, and traditional signature-based antivirus approaches alone are a weak defense against ransomware and unknown threats, which often slip through. Next-generation technologies help with some threats but is in no way foolproof, and adding multiple anti-malware tools on a single endpoint results in too many products that don't work together. To complicate matters, your users are increasingly accessing corporate resources from a variety of locations and devices, and even services in the cloud. You need endpoint security that is smart, optimized, and connected from a proven vendor you can trust.

Trend Micro™ Worry-Free™ Services Advanced, powered by XGen™, is cloud-based security specifically designed to protect all of your endpoints with device and email protection. To save you time and resources, it is hosted and maintained by Trend Micro and combines the following; Worry-Free Services to protect your devices, Trend Micro™ Email Security to protect your on-premises email, and Trend Micro™ Cloud App Security to protect your Microsoft® Office 365® email, Gmail™, and collaboration tools such as Microsoft® OneDrive® for Business, Google Drive™, Dropbox™, and Box.

Trend Micro Worry-Free Services Advanced gives you:

- The ability to detect and block an ever-growing variety of threats, including fileless and ransomware
- The capability to stop email threats in the cloud before they reach your network
- Protection against spear phishing, credential phishing, business email compromise (BEC), and advanced targeted attacks
- An all-in-one lightweight agent

Despite advanced protection layers, there's no such thing as 100 percent prevention. Endpoint detection and response (EDR) helps with stealthy threats detection, but it usually requires a significant amount of time and resources to investigate, and does not cover protection beyond endpoint.

Trend Micro™ Worry-Free™ XDR combines Worry-Free Services Advanced and Trend Micro™ Endpoint Sensor, providing automatic detection and response across email and endpoint, giving you:

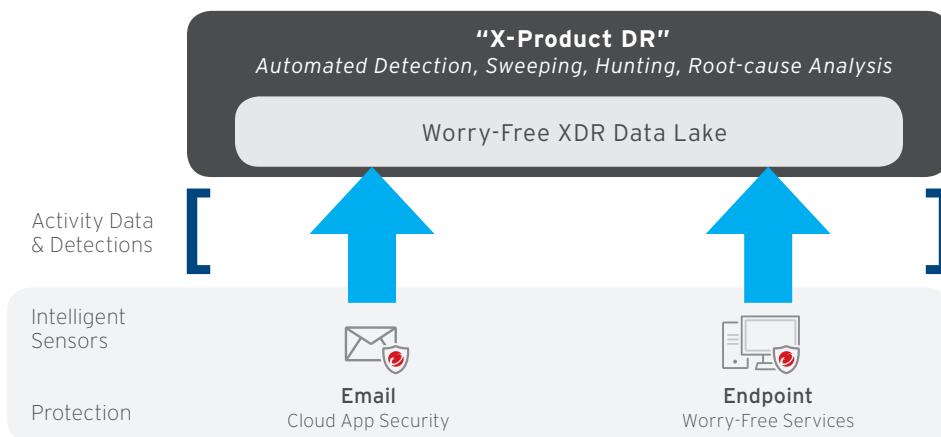

- Automatic data correlation from sensors that collect detection and activity data across endpoint and email—the number one threat vector
- Automated sweeping and root cause analysis, including step-by-step recommended actions, allowing IT admin to mitigate issues quickly
- One console (Worry-Free Services) with native integration to endpoint and email
- Advanced threat detection through cloud sandboxing

PROTECTION POINTS

- Physical endpoints
- Virtualized endpoints
- Microsoft® Windows®, PCs, and Servers
- Mac computers
- Android™ and iOS devices
- Point-of-sale (POS) and ATM endpoints
- Microsoft Office 365 Exchange Online and Gmail™
- Dropbox™, Box, Google Drive™
- Microsoft® Exchange™

THREAT DETECTION CAPABILITIES

- High-fidelity machine learning (pre-execution and runtime)
- Behavioral analysis (against scripts, injection, ransomware, memory, and browser attacks)
- File reputation
- Variant protection
- Census check
- Web reputation
- URL filtering
- Command-and-control (C&C) blocking
- Data Loss Prevention™ (DLP)
- Device control
- Endpoint detection and response (EDR)
- X-product detection and response (XDR)
- Encryption (Microsoft® BitLocker™) management
- Application control
- Firewall
- Business email compromise detection
- Trend Micro™ Writing Style DNA
- Phishing and credential phishing detection

WORRY-FREE SERVICES ADVANCED

KEY FEATURES

Device, user, and data protection from Worry-Free Services

Advanced threat protection and web security

Mobile device security and management

On-premises email protection from Trend Micro Email Security

Inbound and outbound mail filtering

Targeted attack protection

Hosted email encryption

Office 365 email and Gmail protection from Cloud App Security

Protects Office 365 email and other cloud file-sharing services

Detects ransomware and other malware hidden in Office file formats or PDF documents

Identifies business email compromise attacks using artificial intelligence

Gives visibility into sensitive data use with cloud file-sharing services

WORRY-FREE XDR

KEY FEATURES

Detection and response beyond endpoint from Worry-Free Services Advanced and Endpoint Sensor

Correlates data automatically across email and endpoint in one console

Automated detection, sweeping, hunting, and root cause analysis

Advanced threat detection through cloud sandboxing
